Built Around *Your* Business

Warehouse Systems Limited

Every mezzanine we deliver is tailored to your space, operations, and layout. We focus on structural integrity, compliance, and seamless integration, creating a solution that works for your business now and in the future.

Experience that Matters

With nearly four decades of industry experience, our team brings deep expertise across design, fabrication, and installation.

What this means for you: confident decision-making, fewer challenges, and a safe, effective final structure.

Complete In-House Delivery

WSL Warehouse Systems Limited

We manage everything under one roof, from design to manufacture to installation, ensuring quality, speed, and efficiency.

In-house fabrication includes:

- Structural components
- Staircases & handrails
- Safety features (kickplates, knee rails, column guards)
- Pallet gates

What this means for you: faster timelines, better communication, and full quality control.

Compliance You Can Rely On

We ensure all projects meet UK Building Regulations, including:

- Structural safety
- Fire protection and escape routes
- Safe access and edge protection

We handle approvals, documentation, and building control coordination.

What this means for you: no risks, delays, or compliance concerns.

A Proven Reputation

Our work is backed by long-term client relationships, recommendations, and successful case studies.

"WSL delivered a quality warehouse solution on time and on budget in difficult circumstances. Without the fabulous program management and excellence, we would not have been able to commence operations as we have on time. They have been a fabulous partner throughout the program."

FATFACE UNITED KINGDOM

"Our retail mezzanine floors have doubled our space in very short time. WSL provide a fast turnaround. They are very friendly and wonderful people to work with and are always there from start to finish"
